ALERT

5 September 2024

Magnet Fishing in any Waters on Fort Drum is Prohibited

Unexploded Ordnance: Military bases may have unexploded ordnance (UXO) in their waterways which can be extremely dangerous if disturbed. Old and discarded ammunition and explosives are known to be highly unstable, which increases the probability of an explosion causing serious injury or death if disturbed.

In September 2022, 86 rockets, a tank tracer round, and .50-caliber ammo belts were found in the waters on Fort Stewart-Hunter Army Airfield, Georgia.

SAFETY ALERT

SAFETY ALERT

**When you see an item, you believe
may be an explosive,**

**Do not touch it, but carefully
leave the area,**

**Call 911 to notify authorities on
what you have seen and
provide the location.**
