

Appendix 5: Fauna Known to Occur on Fort Drum

LIST OF FAUNA KNOWN TO OCCUR ON FORT DRUM as of January 2017. Federally listed species are noted with FT (Federal Threatened) and FE (Federal Endangered); state listed species are noted with SSC (Species of Special Concern), ST (State Threatened, and SE (State Endangered); introduced species are noted with I (Introduced).

FISH SPECIES

Fish species included in this list are limited to those sampled and verified since 2008. Explanations for this decision are included in the Aquatic Species Management Plan. Additionally, because we do not actively manage fish in Lake Bonaparte or the Black River, fish species known only from those bodies of water (i.e. Cisco in Lake Bonaparte and Common Carp in the Black River) are not included in this list. Changes in this list between INRMP edits will be made in the Aquatic Species Management Plan. Fish naming conventions (common and scientific) are based on names of fish listed in the New York State Fish Atlas as of January 1, 2017.
